Partnership for innovative hotspot solutions

LANCOM Systems and Loop21 to cooperate

Aachen/Vienna, April 15, 2013—LANCOM Systems GmbH and Loop21 Mobile Net GmbH have agreed to cooperate on the development of innovative hotspot solutions within the framework of the LANCOM partner program LANstrategy. LANCOM is the leading German specialist for secure VPN network connectivity and wireless LAN infrastructure. Loop21 based in Vienna, Austria is a developer, producer and operator of WLAN hotspot systems. Both companies are involved in the planning and development of products for business customers.

The aim of the cooperation is to develop new wireless solutions for the hotel and leisure industries, such as those operated in shopping and leisure centers. The growing popularity of smartphones and tablets opens up considerable potential for new services that offer added value for customers and visitors. The WLAN hotspot software developed by Loop21, which features location-based services, content, tour guides, and navigation systems, combines the trend in "WLAN Internet" with infotainment. These added-value projects are being implemented all over the world.

"By cooperating with Loop21, LANCOM Systems supplies technology for innovative hotspot solutions. We can jointly develop and launch innovative products in a minimum of time, which in turn helps us to build on our company's leading position," says Ralf Koenzen, Managing Director of LANCOM Systems.

"The partnership with LANCOM is a milestone in the history of the Loop21. Not only because we have for years already sworn by the quality products from LANCOM, but also because this partnership results in synergies that offer users a variety of options: WLAN positioning, indoor navigation and location-based services make us pioneers in the industry", adds Manuel Urbanek, Managing Director of Loop21.

Further information is available under www.lancom.eu and www.loop21.net.

LANCOM Systems background:

LANCOM Systems is the leading German manufacturer of reliable, innovative network solutions for the commercial and public sectors. The focus is on solutions for high-security site connectivity (VPN) for branch offices, enterprises and public authorities, and also on the wireless networking (WLAN) of public and corporate applications. LANCOM Systems GmbH is headquartered in Würselen near Aachen, Germany and has sales offices in Munich, Barcelona and Amsterdam.
